THE WORKING PROGRAM OF THE DISCIPLINE (MODULE) EUROPEAN EXPERIENCE IN ORGANIZATION OF GREEN TOURISM (ELECTRONIC DOCUMENT)

Direction of training / specialty 43.03.02 Tourism / International tourism Graduate qualification: Bachelor Full-time form of education Year of start of training 2021 Studied in the 6th semester

1. The purpose and objectives of mastering the discipline

The program of the discipline "European experience in organization of green tourism" for bachelors of the direction 43.03.02 "Tourism".

Target study discipline -mastering the competencies that a student should have in the field of ecological tourism.

Tasksmastering the discipline are:

- study of the specifics of the organization and conduct of sports and recreational activities;
- study of the possibility of creating new types of sports and health-improving services in institutions of a sanatorium-resort, recreational-health-improving and tourist-local history profile in order to strengthen the health and social adaptation of the individual;
- acquaintance with foreign experience of health tourism and recreation.

2. Place of discipline in the structure of the educational program

"European experience in organization of green tourism" is an obligatory part. Its development takes place in the 6th semester.

3. Relationship with prior disciplines

"European experience in organization of green tourism" is based on the basic knowledge gained in undergraduate courses: "Physical culture and sports", "Life safety", "Elective courses in physical culture and sports", "Technology organization of tourist activities", "Basic of Tourism", "Regional Geography of Tourism", "Types and Trends of Tourism"

4. Relationship with subsequent disciplines

The discipline "European experience in organization of green tourism" lays the foundation of knowledge serving as a solid information base for studying such discipline "Organization of sanatorium and resort activities."

5.The list of planned learning outcomes in the discipline (module), correlated with the planned results of mastering the educational program

5.1. Competencies name

The code Formulation:				
General cultural competences				
PC-3	can develop and apply technologies for tourism services using technology and information and communication technologies			
PC-4	knows how to organize the process of customer service on the basis of legal acts, taking into account the needs of consumers and the use of customer-oriented technologies.			

5.2.Knowledge, abilities, skills and (or) experience of activities that characterize the stages of the formation of competencies

Planned learning outcomes for discipline (module), characterizing the stages of formation of competencies	Formed competencies
 Know: the history of the development of the hospitality industry, the principles of classification of services and their characteristics; basic concepts in the field of hospitality, necessary to analyze the development of the hotel services market in modern conditions; classification of enterprises in the hospitality industry Be able to: 	PC-3 can develop and apply technologies for tourism services using technology and information and communication technologies;

- to set and solve the tasks of the assortment policy and determine its strategy;
- develop a new service;
- use information technology tools to solve professional problems

Own:

- high motivation for professional work in the field of tourism;
- basic skills of working with information in global computer networks:
- technology for the development of a tourism product that meets the needs of the consumer at a high level;
- the ability to develop and apply technologies of tourist services using technological and information and communication technologies

Know:

- basic needs and psychophysiological capabilities of a person, their relationship with the social activity of an individual;
- theory of service organization;
- features of the emergence of professional relationships between consumers and hotel service specialists.

Be able to:

- - apply all types of services and progressive types of services;
- organize activities in the field of hospitality;
- to identify the characteristics of the consumer working in the "contact zone"

Own:

- skills of conflict-free professional activity in interaction with business partners, colleagues and clients;
- the ability to organize the process of customer service on the basis of legal acts, taking into account the needs of consumers and the use of customer-oriented technologies

PC-4 is able to organize the process of customer service on the basis of legal acts, taking into account the needs of consumers and the use of customeroriented technologies.

6. The volume of the discipline / module

Volume of classes: Total 81 h. 4 C. e.

Including classroom 36 h.

Of them:

Lectures 12 h.

Laboratory work - h.

Practical lessons 24h.

Independent work 45 h.

Test 6 semester

Description of the grading scale

Within the framework of the rating system, the progress of students in each discipline is assessed during the current control and intermediate certification.

Current control

Rating assessment of student knowledge

No. p/p	Activity of students	The timing fulfillment	Quantity points
	6 semester		
one.	Interview Topics 1-3	5 week	15
2.	Interview Topics 4-6	10 week	twenty
3.	Interview Topics 7-9	16 week	twenty
	Total for 6 semester		55
	Total		55

The maximum possible score for the entire current control is set equal to 55. The current control event is considered passed if the student received for it at least 60% of the maximum score set for this control. The rating score given to the student for the current control event, handed over by the student within the timeframe established by the control events schedule, is determined as follows:

Control task performance level	Rating score (in% of the maximum point for the control task)	
Great	one hundred	
Good	80	
Satisfactory	60	
Unsatisfactory	0	

Intermediate certification in the form of an exam provides for a mandatory examination procedure and is estimated at 40 points out of 100. If the student's rating score in the discipline at the end of the semester is 60, then the program automatically adds 32 bonus points and gives the grade "excellent". A student's positive answer on the exam is assessed by rating points in the range from 20 to 40 ($20 \le \text{Sex} \le 40$), a score of less than 20 points is considered unsatisfactory.

The scale of correspondence of the rating score of the exam to the 5-point system

Discipline rating score	Score on a 5-point system
35 - 40	Fine
28 - 34	Good
20 - 27	Satisfactorily

The final grade for the discipline studied in one semester is determined by the sum of the points gained for the work during the semester and the points received when passing the exam:

Scale of recalculation of the rating score by discipline

in the assessment on a 5-point system

Discipline rating score	Score on a 5-point system
88 - 100	Fine

72 - 87	Good
53 - 71	Satisfactorily
<53	Unsatisfactory

8.3 Typical control tasks or other materials necessary to assess knowledge, skills, abilities and (or) experience of activities that characterize the stages of formation of competencies

The test procedure is not carried out as a separate control event; the student's knowledge is assessed based on the results of the current control.

8.4 Methodological materials defining procedures for assessing knowledge, skills, abilities and (or) experience of activities, characterizing the stages of formation of competencies

The current control of students is carried out by teachers conducting practical classes in the discipline in the following forms: interview.

Admission to practical classes occurs if there is a synopsis of the corresponding lecture and a synopsisindependently studied literature on the topic. For a practical lesson, the student must prepare answers to questions, complete tasks on the topic of the lesson.

A student receives the maximum number of points if he actively participates in the work, owns the material, is able to logically and clearly express thoughts, creatively approaches the solution of the main issues of the topic, shows independence of thought.

The reasons for the decrease in the assessment are:

- poor knowledge of the topic and basic terminology;
- passivity of participation in group work;
- lack of ability to apply theoretical knowledge to solve practical problems;
- untimely provision of completed works.

The criteria for evaluating the results of independent work are given in the Foundation for Evaluating Means by Discipline.

9. Methodical instructions for students on mastering the discipline

At the first stage, it is necessary to familiarize yourself with the work program of the discipline, which considers the content of the topics of practical lessons, topics and types of independent work. For each type of independent work, certain reporting forms are provided

For the successful mastering of the discipline, it is necessary to perform the following types of independent work, using the recommended sources of information.

P/		Recomm	ended sources of in	formation (source	number)
p No.	Types of independent work	The main	Additional	Methodical	Internet resources
one.	Independent study of	one	one	1-2	1-4
	literature on topics No. 1-14				
2.	Preparing a message for the	one	one	-	1-4
