Description of the rating scale

Within the framework of the rating system, students' progress in each discipline is assessed in the course of ongoing monitoring and intermediate certification.

Current control

№	Type of activity of students	Terms of implementation	Amount of points
7 term			
1.	Interview on themes 1-3	5 week	15
2.	Interview on themes 4-6	10 week	20
3.	Interview on themes 7-9	15 week	20
Total for 7 term			55
Total			55

The maximum possible score for the entire current control is set equal to 55. The current control measure is considered «pass» if a student got not less than 60% of the established maximum score. Rating score applied to the student for the current control measure, passed by a student on control activities schedule, is defined as follows:

Level of control task completion	Rating score
Excellent	100
Good	80
Satisfactory	60
Unsatisfactory	0

Interim assessment

The interim assessment in the form of exam provides compulsory examination procedure, and evaluated 40 scores out of 100. If the student's rating score for discipline at the end of the semester is 60, then the program automatically adds 32 bonus points and puts the mark "excellent". The affirmative exam answer of the student is assessed by the rating scores range from 20 to 40 ($20 \leq \text{Exam} \leq 40$), less than 20 scores is «unsatisfactory».

Rating Exam Rating Scale 5-point system

Rating score for the discipline	Five-point rating
35 – 40	Excellent
28 – 34	Good
20 – 27	Satisfactory

The final grade for the discipline studied in one semester is determined by the sum of the points scored for work during the semester, and the points obtained when passing the exam:

Discipline Rating Scale 5-point rating

Rating score for the discipline	Five-point rating
88 – 100	Excellent
72 – 87	Good
53 – 71	Satisfactory
<53	Unsatisfactory

The procedure for conducting the **examination** is carried out in accordance with the Regulation on the conduct of the current monitoring of academic performance and intermediate certification of students on educational programs of higher education - bachelor's programs, specialty programs, master's programs - in NCFU.

The exam ticket includes: 3 questions.

For preparation for the ticket is given: 30 minutes.

Current monitoring of students is carried out by teachers conducting practical classes in discipline, in the following forms: an interview.

Admission to **practical** classes takes place when there is a summary of the relevant lecture and a summary of independently studied literature on the topic. To the practical lesson, the student must prepare answers to questions, perform tasks on the topic of the lesson.

The student receives the maximum number of points if he actively participates in the work, owns the material, knows how to logically and clearly express thoughts, creatively approaches the solution of the main issues of the topic, shows the independence of thinking.

The reason for the decrease in the evaluation are:

- poor knowledge of the topic and basic terminology;
- inactivity of participation in group work;
- lack of the ability to apply theoretical knowledge to solve practical problems;
- untimely submission of work performed.

Criteria for evaluating the results of independent work are given in the Fund of assessment tools for discipline «Оздоровительный туризм / Wellness tourism».

9. Methodical instructions for students to learn the discipline

At the first stage it is necessary to study the working program of discipline in which the maintenance of the topics of a practical training, subjects and types of independent work are considered. By each type of independent work certain forms of the reporting are provided

For successful development of discipline, it is necessary to execute the following types of independent work, using the recommended information sources:
